

The Sustainable Solution for Cooling, Boiler, and Waste Water Treatment.

# FULLSERVICE™ Water Management

Providing water treatment services is not a new concept at RMC. In fact, we have been providing water treatment services in North America since 1950.

RMC maintains warehousing and depots in all major metropolitan cities across North America to ensure timely, high quality distribution and service to our FULLSERVICE customers. Our strategic “footprint” affords us the ability to provide coverage throughout the U. S. and Canada while still maintaining a local presence and personal service.

## Our FULLSERVICE Program Offers:

### Results

- Clean heat transfer systems mean reduced energy consumption.
- Longer equipment life means reduced capital expenditures.
- Neater, cleaner mechanical rooms.
- Safety
- Secondary containment.
- No chemical handling.
- No odors, safe handling and increased sustainability with SolidGuard.

### Convenience

- Point of use delivery or SolidGuard Technology.
- No container disposal or complete container elimination.
- Dependable automation.

### Savings

- Concentrated chemistries.
- Joint process initiatives (JPI).
- Level payments with our TEAM Agreements.
- Volume purchase discounts.

SolidGuard

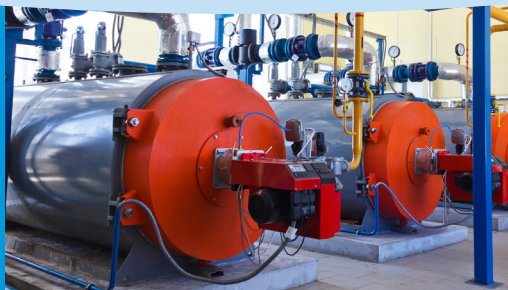

# RMC is Driving **Convenience** and Safety with FULLSERVICE Programs

**AssetGuard Service Report**

Item	Value	Unit	Notes
Water Treatment	100%	%	On Schedule
Asset Protection	95%	%	Minor Issues
Environmental	100%	%	Compliant
Delivery Services	100%	%	On Time
Legionella Control	100%	%	Safe
Glycol Services	100%	%	Asset Protected
Cleaning Services	100%	%	Equipment Extended
SolidGuard	100%	%	Sustainable

# Sustainability

Our water management programs are designed to protect and enhance equipment life while providing energy and cost savings through improved heat transfer efficiency. Our goal is to build sustainable programs for water management by focusing on financial benefits, environmental stewardship and improvements to workplace health and productivity.

## People

- Training Programs
- Reduce Labor Time
- Reduce occupational Safety Hazards
- Legionella Risk Minimization

## Planet

- Clean Heat Transfer Saves Energy
- Lower Water and Chemical Usage
- Reduce Carbon Footprint

## Profit

- Fuel, Water and Chemical Savings
- Extends Equipment life and saves capital
- Recycle of Processed Water Saves on Total Water Expense
