

Sustainable Solutions for Health, Productivity and the Environment.

Comprehensive Water Management for Commercial Laundries

RMC has been a partner to laundries for 20 years and we share your vision for safe and sustainable operations.

RMC's comprehensive water management program saves water and energy dollars while increasing productivity and product quality. RMC partners with you for a positive return on your investment measured by joint process Improvement Initiatives (JPI) that measure savings and sustainability improvements.

- Optimize fuel use
- Onsite testing, monitoring
- Extend asset life
- Analysis and training
- Exceed wastewater targets
- Sustainable, replicable programs
- Reduce solid waste
- Safer, more convenient, space saving solid technology

Boiler Water Programs

The goal of all boiler water programs is to maintain clean heat transfer surfaces. Beyond preventing insulating deposits, the program must protect system metals from the damaging effects of corrosion.

Rochester Midland treatment options include chelant, all polymer, phosphate or carbonate programs. These available technologies used in conjunction with a wide selection of dispersants, oxygen scavengers and return line treatments will ensure safe, efficient boiler system operation.

- Scale Inhibitors
- Oxygen Scavengers
- Steam Line Treatment
- Fuel Treatment
- Antifoam
- Feed and Control Systems
- System Cleaners
- Closed Loop Treatment

Protect your physical plant assets anytime anywhere.

Information and communication are critical to effective and efficient water treatment program operations in your plant. RMC's new AssetGuard Online Toolbox can help ensure that critical information regarding your programs is readily available in a central, secure, online account.

Solid Treatment

SolidGuard 10

=

Solid Chemicals
One Gallon Containers
8-10lbs

=

Liquid Chemical
55 Gallon Drum
400-500lbs

RMC's Solid Treatment Chemicals have proven to provide effective deposit and corrosion control thereby saving fuel and energy.

4 gallons of RMC Solid Treatment Chemicals are equivalent to a 55-gallon drum of liquid chemical treatment. Use what is needed, when it is needed, with no chance of liquid spill or component separation. No mixing equipment needed.

Where floor or storage space is at a premium, the compact size of RMC Solid Treatment Chemicals will conserve space and allow it to be put to better use.

Wastewater

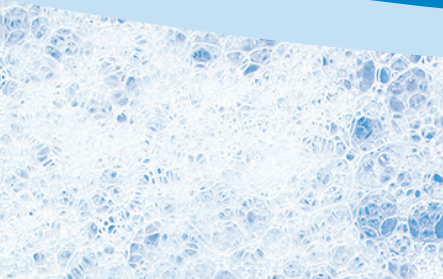

Environmental regulations and public concern for environmental issues are on the rise. Frequently there are increases in your level of responsibility as an operator of a waste treatment plant. Zero Discharge, Water Recycling, Environmental Compliance, Surcharge Reduction, BOD – COD – FOG Removal, Odor Elimination, Oil Separation... these are only some of the issues facing industry and manufacturing today.

Rochester Midland has experience in nearly all types of production and manufacturing. Our consultant representatives will work on-site with your staff to develop a program centered around meeting your environmental goals, reducing your operating costs, and keeping you in compliance.

- Coagulants
- Flocculants
- Defoamers
- Bioaugmentation
- Odor Control
- Chemical Application Systems

Sustainable

Our water management programs are designed to protect and enhance equipment life while providing energy and cost savings through improved heat transfer efficiency. Our goal is to build sustainable programs for water management by focusing on financial benefits, environmental stewardship and improvements to workplace health and productivity.

People

Planet

Profit

Solid Chemicals

- Solids eliminate spills and reduce trips and falls.
- Lighter, smaller packaging for solids reduces injuries.
- 50-90% Fewer lbs. shipped.
- Reduced weight equals reduced fuel usage and CO₂ Emissions.
- Less lost time injuries.
- No drum disposal costs.

Boilers

- Training.
- Automation.
- Energy savings.
- Water savings.
- Asset protection.
- Energy savings.
- Water savings.

AssetGuard

- Easy data access & analysis.
- Improved decision making.
- Lower water and chemical usage with controllers & sensors.
- Fuel, water and chemical savings with additional program control.

Wastewater Programs

- Training eliminates upset conditions and frustration.
- Metals, oil and grease removal at the plant ensures clean water returned to the environment.
- Market competitive pricing reduces wastewater treatment costs.
- Compliance eliminates fines and surcharges.
