Hand San

Advanced hand sanitizer formulation for professional environments with Ethyl Alcohol.

Hand San

Advanced hand sanitizer formulation for professional environments with Ethyl Alcohol.

Where to Use

Hand San is an alcohol based hand sanitizer with lotion recommended for professional environments such as Healthcare, Education Environments, Building Services Contractors, General Hand Hygiene, and Food Handling, (satisfies USDA Category 3).

The CDC continues to encourage frequent hand washing to prevent the spread of illness as it relates to both the Coronavirus and Influenza. If soap and water are not readily available the CDC recommends the use of alcohol sanitizers with a minimum active ingredient level of 62% ethyl alcohol.

Applications

- Education Environments
- Healthcare
- Building Services Contractors
- Food Handling

Benefits

- Fast evaporation rate
- Non-irritating
- Doesn't require potable water rinse after use
- Reduces skin dryness
- No mixing required

Features

- Contains alcohol
- Contains a safe emollient
- Ready to use
- Prevents the spread of bacteria

Directions for Use

Use Hand San in conjunction with standard hand washing procedures. Or as specified by management to reduce risk of cross contamination, such as hand-to-food and hand-to-equipment contamination. After washing hands, spray entire surface of hands, including fingertips and cuticles. Rub hands vigorously-until dry. No rinse or toweling is required.

Hand San must be dispensed from an adequate dispenser located a sufficient distance from food processing lines to prevent accidental product contamination.

Hand hygiene and other preventive measures

- Household members should clean hands often, including immediately after removing gloves and after contact with an ill person, by washing hands with soap and water for 20 seconds. If soap and water are not available and hands are not visibly dirty, an alcohol-based hand sanitizer that contains at least 60% alcohol may be used. However, if hands are visibly dirty, always wash hands with soap and water.
- Household members should follow normal preventive actions while at work and home including recommended hand hygiene and avoiding touching eyes, nose, or mouth with unwashed hands.
 - o Additional key times to clean hands include:
 - After blowing one's nose, coughing, or sneezing
 - After using the restroom
 - Before eating or preparing food
 - After contact with animals or pets
 - Before and after providing routine care for another person who needs assistance (e.g. a child)

Available Package Sizes	Package Code	
55 Gallon Drum	#11819157	
4x1 Gallon Case (No pump included in case)	#11819127	
Hand Pump Dispenser	#35652300
