RMC Backpack Disinfecting System (BDS)

Backpack Disinfecting System (BDS)

Disinfect using our light-weight design backpack which allows you to spray and operate effortlessly with a touch of a wireless remote control. Each backpack bladder holds 2 Liters of solution and comes with 1 extra bladder. The variable speed pump system has an output of 170 PSI that sprays the solution on your intended surface. An 18 inch wand allows for easy coverage in hard to reach areas.

USE LESS SOLUTION – Uses up to 65% less product than a trigger style spray bottle.

DISINFECT EFFICIENTLY – The BDS can cover 3 X's more area than a spray bottle. Decreases labor times and risk of injury from repetitive trigger use.

MORE COVERAGE – The steady spray of the system covers 4-5000 square feet per bladder fill allowing coverage of more surface area quickly, evenly and efficiently.

LIGHTWEIGHT – Empty, the backpack weighs 16 ounces filled with 2 Liters (~2 quarts) of solution, the entire system weighs under 6 lbs.

MOBILE- Battery operated system. Battery lasts between 5-10 hours depending on selected pump speed. No cords, canisters or bulky equipment to handle.

COMFORT – The backpack was designed for runners and hikers and is fully adjustable for comfort.

WIRELESS REMOTE – Variable speed remote for easy on/off and spray density control.

STAINLESS STEEL WAND - the 18" stainless steel wand allows extended reach above cabinets, partitions and around fixtures.
