95%

of users believe that washroom cleanliness impacts overall public health

88%

Of users believe that overflowing trash cans and feminine waste Hygiene receptacles are another sign of unclean washrooms

4 main reasons why washroom smell

1. Urine & Fecal Matter

2. Drains

3. Floor Grout

4. Overflowing Fem Bins

Urine and Fecal matter are the sources for foul odors and odor causing bacteria.

Sewer gas vents upwards from drain traps in washrooms, causing musty and foul odors.

A smelly washroom with overflowing trash poses a health risk to employees and guests

Embedded urine, bacteria and other soils on floors are the common causes of grout odor.
