

## How to Restart your Washroom

People are going to have to be made comfortable coming to the workplace and coming back to your facilities

- ✓ Create a checklist
  - Of things you should consider to safely open your place of work
  - Products you need to help you maintain a safe and healthy environment.
  - For your peace of mind(Check out our resource named WBH Checklist to keep your business open during pandemic crisis).
- ✓ Meet with your employees and assure them that you are creating a hygienic and sanitary environment for them to work in. Remind them to Sanitize their hands frequently.
- ✓ Ensure that you have a great cleaning company that adheres to all cleaning and disinfecting procedures recommended by CDC and Health Canada. Ensure that they use products that are approved by CDC and Health Canada. RMC hygiene experts can visit your premises and offer suggestions on how to effectively use various RMC sanitizing and disinfecting products.
- ✓ In addition to Sanitizing and Disinfecting, you also need your washrooms running efficiently at all times. Ensure you have a system that not only deodorizes, but cleans your toilets and urinals all the time.
- ✓ For your female employees and patrons, consider installing Hands Free Feminine Hygiene Waste Disposal Bins. Consider increasing frequency of service.
- ✓ If your place of business does allow infants and toddlers to accompany the customers, then ensure that washrooms are installed with Infant Hygiene waste disposal bins to grab all soiled diapers to create sanitary washroom environment.
- ✓ Your RMC hygiene expert on all matters related to sanitation and hygiene is just a phone call away.
