# Total Floor Care

# Total Floor Care

With the RMC Floor System that matches your needs, you can get clean and great looking floors fast.

At RMC, we realize that the concept "one size fits all" does not apply when it comes to floor maintenance systems. The needs of schools, hospitals, retail, offices complexes and public facilities are all different – different traffic conditions, different surfaces, different soils, and varying labor budget limitations. From tough care-free programs to ultra-high gloss systems, we have a coordinated family of products that provide results. There is an RMC floor care system that matches your needs and works for you.

## High Performance Floor System

- Exceeds ASTM Non-Slip Coating Standards
- Highly Detergent Resistant
- Gloss Deepens with Every Burnishing
- Smooth & Easy Application
- Long Lasting Shine & Protection
- Fast Burnish Response

If your business requires a system that results in extraordinary "wet look" gloss, maximum protection and durability, RMC's High Performance System meets your needs and then some. The success of any high performance system requires a world-class floor finish. RMC's Thermo Gloss® Plus is the perfect choice for frequent floor care programs. Thermo Gloss Plus delivers a clear, durable film that quickly burnishes to ultra high gloss levels. It resists black heel marks and scratches and withstands the heaviest traffic loads. Thermo Gloss Plus is self-sealing – no seal coats are required.

## Less Frequent Care Floor System

- Exceeds ASTM Non-Slip Coating Standards
- Highly Detergent Resistant
- Brilliant Gloss Without Frequent Burnishing or Spray Buffing
- Smooth & Easy Application
- May Also Be Applied to Non-Resilient Surfaces such as Concrete

Maximum protection, maximum durability. This system is designed expressly for areas where you need toughness and durability to stand up to heavy traffic and soil loads. If you need deep brilliant gloss but haven't the labor resources for daily burnishing, this system is for you. At the foundation of this system are our extremely durable floor finishes, Ultra Marathon® and high solids Duo Cote® Fusion. These deep gloss finishes are impervious to soil penetration and greatly extend recoating and stripping cycles. Ultra Marathon and Duo Cote Fusion can be maintained by scrub/recoat systems, burnishing, spray buffing or by restoration.

RMC has a Floor Maintenance System to fill any need for every client type: High Performance, Infrequent Maintenance, Flexible Maintenance Floor Systems, or Green Housekeeping. You can meet your requirements exactly, with no guesswork when utilizing RMC's coordinated family of floor care products – cleaners, finishes, strippers and restorers all designed for compatibility and maximum performance.

At RMC, we specialize in delighted customers. Let us show you how our Floor Care Programs offer you the best in value and performance. You can count on RMC. After all, we've been providing products for cleaner, healthier facilities since 1888.

## Green Housekeeping Floor System

- UL and Green Seal Certified
- Exceeds ASTM Non-Slip Coating Standards
- No Zinc Complexes or Endocrine Disrupters
- Brilliant Dry-Bright Gloss
- Effortless & Foolproof Application
- Long Lasting Shine & Protection

RMC's Enviro Care® family of maintenance products fits the needs of the environmentally conscience buyer. Our Enviro Care Novus provides deep gloss shine and maximum protection without the use of zinc complexes or plasticizers suspected of being endocrine disrupters. As with our Flexible Care Floor System, any standard floor care procedure may be used with RMC's Green Housekeeping System – frequent or infrequent burnishing, scrub/recoat, or spray buffing.

## Ultra High Solids Floor System

- Exceeds ASTM Non-Slip Coating Standards
- Highly Detergent Resistant
- Brilliant Dry-Bright Gloss
- Highly Responsive to Polishing
- Long Lasting Shine & Protection
- Use with any Maintenance System

Floor care programs that require maximum productivity demands a system that offers Ultra High Solids PLUS high gloss and maximum protection using any maintenance method. RML's Ultra High Solids Floor Care System utilizes, DuoCote Fusion floor finish. This is an easy to apply formulation that responds to any floor care process – frequent burnishing, periodic burnishing, restoration, or scrub/recoat procedures. Available in a 32% total solids finish, which requires fewer coats and less labour.

Coverage - 3000+ sq.ft.
