Viva Aircare System

# oxygen

## Air Care System

Oxy-Gen Powered technology is a new innovation that harnesses oxygen to deliver pure **fresh and soothing fragrances** without harming those enjoying the air.

- Low VOCs: No harmful emissions, solvents or propellants
- Oxygen Air Care System can reduce the amount of VOCs being emitted by up to 90% when compared to aerosol cans
- The refill is 100% recyclable and safe to dispose of in your regular plastic recycling waste
- Less waste, safer storage
- Works against gravity so the fragrance oil won't pool or leak

## The next generation air fresheners

It does not use old aerosol or spray technology; it is a new generation of air freshener and the world's first to use new Oxy-Gen Powered technology.

### Create the 'WOW' factor

The Oxygen Air Care System emits intensely-scented pure fragrance continuously, creating a permanently fresh environment that has impact every time you walk into the room.

Oxy-Gen Powered technology is a clean source of power, producing continuous levels of intense fragrance that contain no propellants, solvents or CFCs – just pure natural scent.

Each fragrance has been selected for their intensity; each has been extensively tested for performance over the refill life; each has been field tested for popularity and appeal.

*“It's good to have an air freshening system that isn't harmful to the planet & people.”*

# Better for freshness

Most air fresheners work by masking bad odors with heavy perfume. The Oxygen Air Care System uses neutralox, a proprietary odor neutralizing agent to eliminate, not mask, any bad odors, leaving only fresh scent in the air.

## What is NeutraLox Odor Neutralizer?

When the fragrance molecules are released, they diffuse into the air in the room. Proprietary NeutraLox Odor Neutralizer molecules eliminate competing malodour molecules, allowing the fresh scent molecules to spread out and fill the surroundings where they linger in the air. Eliminates bad odors such as tobacco, kitchen odors, sweat, mildew, animal and body odors.

*“The first thing I noticed when I walked in the room was the fantastic scent.”*

*“I know the washroom is clean, just because it smells so fresh.”*

A fresh, invigorating scent with fragrant lavender and spicy herbs.

An invigorating scent of green apple and pear softened with peach and pineapple

An intensely fruity perfume with hints of orange supported by warm spices

Juicy black cherries, hints of almond and plum on a background of vanilla and cinnamon spice

## Consistent fragrance levels - guaranteed

Oxygen Air Care System is designed and engineered to deliver consistent and continuous levels of fragrance and odor control for the full life of each refill.

## Maximum efficiency, low maintenance

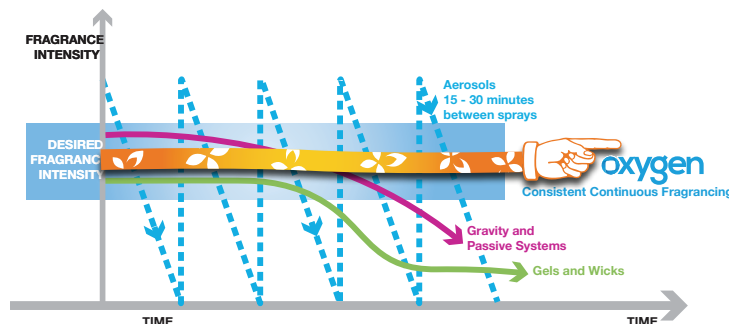

Simple to install and refill, the Oxygen Air Care system fits easily into our sustainability program, with refills that are completely recyclable & batteries that last up to 2 years.

## Stylish designs that work in any room

Compact and contemporary, the Oxygen Air Care System unit will complement any room – from luxurious lounges to working washrooms.

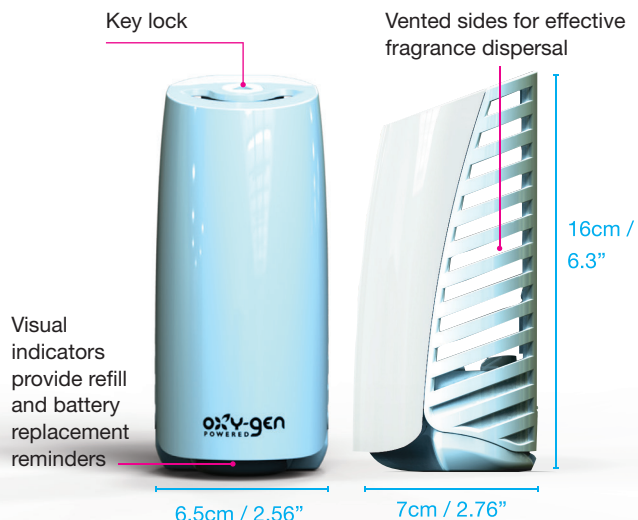

**60 day refill life**  
**CONSISTENT FRAGRANCING**  
**GUARANTEED**

**! Refills are compliant  
with Californian Air  
Resources Board (CARB)**

- > Simple to install and refill – just twist and go
- > Operates on 2 AA alkaline batteries (*not included*) that last up to 2 years
- > Empty refills can be safely disposed of as plastic recycling
- > Perfume oil is gradually dispersed delivering a continuous and consistent fragrance intensity
- > Unique cellular diffuser will not dry out or become saturated too quickly
- > Can be positioned at any height
- > Silent operation
